

Cellzome is a privately-owned drug discovery company identifying a new generation of kinase-targeted drugs to treat inflammatory diseases. Its pipeline of small-molecule therapeutics is driven by *Kinobeads*[™], a proprietary proteomics technology. Cellzome employs about 90 people at its two laboratories in Cambridge, UK and Heidelberg, Germany.

In the IT department at our site on the EMBL campus in Heidelberg we have a full time opening for a

Scientist, Life Sciences Informatics (m/f)

Position:

As member of a Data Analysis team, the Scientist Life Sciences Informatics will support the following activities:

- Analysis of chemistry and biology data generated in the company's research projects;
- Development of new analytical methods to support the company's proprietary technologies, data and processes;
- Set-up and maintaining projects in our LIM systems;
- Development of proprietary software applications for scientific data management and analysis.

The position reports to the Group Leader Informatics.

Profile:

- PhD or M.Sc. in the Life Sciences with a strong background in (Bio-)Informatics and Statistics
- Experience in understanding, transforming and presenting scientific data
- Familiarity with lab processes (biochemistry, cell-based assays etc.)
- Proficiency in R language for data analysis and visualization
- Proficiency in at least one other programming language (Python, Java or other)
- Ability to manipulate data stored in RDMS (Oracle, MySQL)

We are looking for a motivated, proactive and analytical-minded person, who combines strong interpersonal skills with team spirit. The ideal candidate possesses the ability to work in a multi-disciplinary environment and has good communication and presentation skills in English.

Cellzome provides a high quality, international research environment and offers an attractive compensation package.
