

## **Hiring: A graduate with exceptional analytic and communications skills in the range of HealthCare IT**

We are a small team with a huge drive, working on strategic and operational consulting for companies within the European healthcare IT and medical engineering sector. Our clients are aiming to enter new regional markets – and we can help!

As a consultant you will be working in the field of research/consulting and this would be your line of action:

- research for go-to-market-camps projects with business supporting organizations and companies
- consulting and presentation of go-to-market camps
- supporting us on fairs and congresses
- customer care
- together with the management developing new consulting concepts
- customer acquisition
- discrete compilation of a market analysis concerning health care infrastructure with a focus on health care services in Europe (country by country)

Because we are working international, you should love travelling. Your place of action would be Berlin.

We are looking for:

### Professional skills

Very good English writing and language skills - another language would be helpful

You should have heard something about HL7

The hospital workflow is not a secret for you

IT knowledge (MS Office)

### Personal skills

Thorough, responsible, autonomous, detail-oriented and proactive creative thinker

How far you go is in large part up to you – but we will do our best to help you, we do however expect you to start at a fairly high level.

We will be interviewing candidates as they apply, so send your motivated cover letter along with your CV to: Antje Heinlein: [ah@gtmhc.eu](mailto:ah@gtmhc.eu)

If you have any questions about the job, feel free to email to: [ah@gtmhc.eu](mailto:ah@gtmhc.eu) !
